

US Child Health Care Trends

Compiled by AAP Research Staff

January 2024

The slides that follow are meant for AAP staff and leaders to use.

- No permissions are required.
- The graphics are developed from publicly available federal data sources.
- The categories and terms expressed in each graphic are based on what is available from these public data sources.
- At the bottom of each slide, the data source is given, and a link is provided for those seeking more information about the data source and possible data limitations.
- Based on data available as of December 2023

Health Care Access Trends

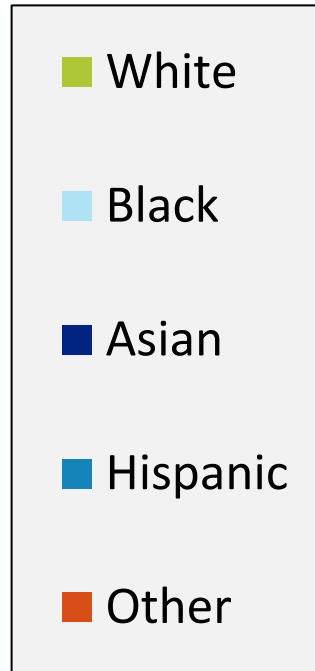

- Health insurance coverage
- Uninsurance by state
- Usual source of health care
- Dental visits

US Children (Ages 0-18) Uninsured by Race and Ethnicity, 2022

Number of Uninsured Children

Child Population

Note: Children are considered uninsured only if they did not have health insurance coverage for the entire calendar year.

% of US Children (Ages 0-17) with Public Health Insurance Coverage at Time of Interview by Race and Ethnicity, 1997-2021*

*Estimates for 2019 and beyond are not directly comparable to previous years due to a survey re-design.

% of US Children (Ages 0-17) with No Health Insurance Coverage at Time of Interview by Race and Ethnicity, 1997-2022*

*Estimates for 2019 and beyond are not directly comparable to previous years due to a survey re-design.

Source: CDC/NCHS, National Health Interview Survey – 1997-2018: (<http://www.childstats.gov/americaschildren/tables/hc1.asp>) and 2019-2022: (https://www.cdc.gov/nchs/data/nhis/earlyrelease/insur202305_1.pdf)

% of US Children (Ages 0-17) with No Usual Source of Health Care by Poverty Status According to Parent Report, 1997-2022*

*Estimates for 2019 and beyond are not directly comparable to previous years due to a survey re-design.

Source: CDC/NCHS, National Health Interview Survey
<http://www.childstats.gov/americaschildren/tables/hc2.asp> and https://wwwn.cdc.gov/NHISDataQueryTool/SHS_child/index.html

% of US Children (Ages 0-17) with No Usual Source of Health Care by Health Insurance Coverage Type According to Parent Report, 1997-2022*

*Estimates for 2019 and beyond are not directly comparable to previous years due to a survey re-design.

Source: CDC/NCHS, National Health Interview Survey
<http://www.childstats.gov/americaschildren/tables/hc2.asp> and https://wwwn.cdc.gov/NHISDataQueryTool/SHS_child/index.html

% of US Children (Ages 2-17) with a Dental Visit in the Past Year by Age, 1997-2021*

*1997-2015 uses the National Health Interview Survey, whereas 2016-current uses the National Survey of Children's Health Survey. As a result, estimates for 2016 and beyond are not directly comparable to previous years.

AAP Research analysis of Child and Adolescent Health Measurement Initiative (CAHMI), National Survey of Children's Health (NSCH) (<https://www.childhealthdata.org/>)

Health Care Takeaways

- % of uninsured children has declined
- % of children with public insurance has gone up, more than doubling since 2000
- Hispanic children most likely to have no health insurance
- Variability in uninsurance across states
- % of children with no usual source of health care has gone down
- % of children with dental visits declined sharply in 2020 but stabilized in 2021
